### **Portfolio Analytics**

Use data and analytics to solve business problems

### **Quantitative Modelling**

Research and develop financial models

### **Risk & Quantitative Analysis**

Manage BlackRock's fiduciary and enterprise risk

Full details of each role follow.

# Aladdin Wealth Tech

Positions are available in all regions: Americas, Europe, and Asia Pacific

We are a fast-growing FinTech business operating within BlackRock Solutions, and our mission is to demonstrate the power of BlackRock's data, scale, and financial models to give financial advisors the edge they need to build better portfolios and deliver better outcomes to their end customers.

The Aladdin Wealth Tech team partners with wealth management clients to help them oversee their enterprise risk, build better portfolios, and enhance their value proposition to clients. This is achieved by leveraging risk analytics - powered by Aladdin® - to equip wealth management clients with model construction capabilities, risk monitoring tools, and portfolio construction & analytics.

## We're hiring for the two teams below:

### Client Teams

Manage and grow client relationships throughout the entire client life cycle from early stage sales pitches to technical implementations to managing live clients on the Aladdin Wealth platform

### Product Teams

Design, develop, and deliver software and services that empower wealth managers to create better portfolios and deliver more value to their clients

Innovate and create higher scale in all aspects of our business, including the product, operations, and client service model

## What will you do as an analyst?

### Client Teams

- Function as the internal representative for clients by driving alignment between the Aladdin Wealth offering and client needs
- Gather, compile, model, validate, and analyze data to provide meaningful insights
- Be the primary point of contact for all Tools, Analytics and Data related client inquiries
- Perform technical analysis and support the design and development of new Aladdin Wealth product and risk capabilities
- Learn about our clients business strategy and the broader wealth management industry to inform the product roadmap

### Product Teams

- Develop application software and infrastructure in Java/Scala (back-end engineering) or Typescript with React (front-end)
- Monitor and support the Aladdin Wealth platform
- Iterate on UI/UX with design teams to create experiences that maximize user delight for financial advisors (front-end)
- Measure, analyze, and improve the performance and reliability of Aladdin Wealth external APIs (back-end)
- Leverage distributed computing technology to scale up Aladdin Wealth capabilities to millions of portfolios (back-end)

# Aladdin Wealth Tech

## What capabilities are we looking for?

- Strong project management and coordination skills; able to manage multiple priorities
- Strong technical problem-solving skills and analytical thinking
- Strong communication skills, both written and verbal, with the ability to convey sophisticated concepts simply and clearly
- Strong computer skills and an aptitude for learning new systems. For back-end focused roles, a passion for distributed databases is useful. For front-end focused roles, experience with Typescript is useful

## Your learning & development will include:

- A robust training program and ongoing development through your time with the firm
- The skills and support network you need for a successful career at BLK
- The opportunity to work with some of the most sophisticated clients globally, whilst learning fundamental financial and technological skills
- Mentorship from experienced software engineers, product managers, analytics specialists and client relationship managers on the team

# Financial Markets Advisory

Positions are available in: Americas and Europe

The Financial Markets Advisory business advises financial institutions, regulators and government entities on their most critical and complex financial issues – from bank stress-testing, to unwinding a portfolio of assets, to crafting and executing bond purchase programs to support the economy.

We leverage BlackRock's Aladdin technology and the firm's sophisticated capital markets, risk analytics, data management and financial modeling capabilities to deliver results-oriented consulting and advisory services, while maintaining an information barrier from the rest of the firm.

Since our founding, we have completed over 500 assignments for more than 280 clients in 37 countries. Our professionals work out of all three BlackRock regions (Americas, Europe, Asia Pacific), allowing us to serve clients in all locations and time zones and respond to urgent needs as they arise.

## Our business contains four teams:

**Portfolio Construction and Balance Sheet Solutions**, including Sustainability and Climate Risk Advisory

**Data, Analytics & Financial Modeling**

**Capital Markets & Transaction Support**

**Enterprise Risk & Regulatory Advisory**

## We partner with:

- **Internally:** We leverage BlackRock's Aladdin technology and the firm's sophisticated capital markets, risk analytics, data management and financial modeling capabilities to deliver results-oriented consulting and advisory services, while maintaining a stringent information barrier from the rest of the firm.
- **Externally:** We engage with financial institutions, regulators, central banks and governments, providing consultancy services to institutions in both public and private sector.

## What will you do as an analyst?

- Learn about financial institutions, markets, and the key financial issues of the time
- Develop deep practitioner insight and leading research capabilities
- Be afforded a diverse professional experience with broad reach across the public and private sectors, interacting with clients to present results, address requests and questions
- Develop analytics and data management skills by leveraging state-of-the-art technology, modeling expertise, and a global risk analytics platform
- Build an understanding of regulation and enterprise risk management practices
- Play a key role on multi-disciplinary project teams including financial experts, market practitioners and technologists, assisting in leading project progress and executing key action items
- Build and deploy subject matter expertise across a range of themes in order to help clients achieve their objectives, including bank balance sheets, capital markets, data and analytics, etc.
- Hone a disciplined advisory approach and flexible delivery model to support our clients

# Financial Markets Advisory

## What capabilities are we looking for?

- Excellent problem-solving abilities and intellectual curiosity
- Meticulous attention to detail and strong sense of initiative and ownership
- Effective communication and presentation skills
- An aptitude for analytical work and a structured approach to sophisticated analysis
- Proven project management skill in executing multi-faceted assignments
- Strong willingness to perform work as part of a hardworking international team
- Interest in financial institutions and capital markets
- Quantitative coursework and familiarity with programming languages is a plus

## Your learning & development will include:

- Developing analytical skills by performing quantitative analyses in support of client engagements and synthesizing the results in client presentations and pitch materials
- Gaining a deep understanding of data, analytics, and modeling using BlackRock's proprietary technology and relevant programming languages.
- Build, improve, and execute projects in a scalable manner

# Portfolio Analytics

Positions are available in: Americas, Europe, and Asia Pacific

The Portfolio Analytics group delivers analytics that provide transparency to each client's portfolio on Aladdin. We weave together Aladdin's world-class data, financial models and technology to develop meaningful insights for investment and client teams. Analysts on our team will develop a broad understanding of finance, clients, and technology. They will learn to navigate teams across BlackRock, to explore opportunities for new ways to apply data and analytics with high impact and deploy enhanced analytics to provide actionable insights into portfolios.

## Our business contains five teams:

### Client Business Analytics

- Enable the firm to deliver tailored investment solutions and develop deeper partnerships with institutional clients
- Deliver sales enablement analytics and peer group analysis tools to drive sales of BlackRock products

### ETF and Fund Analytics

- Provide analytic solutions to product and portfolio consulting teams that enable deeper client engagements and facilitate sales
- Deliver analytic insights that generate efficiencies in the investment and risk management processes of our ETF and Index Investments businesses

### Asset Allocation Analytics

- Provide analytical insights and bespoke portfolio implementation tools to Multi-Asset Strategies and Client Portfolio Solutions businesses
- Evolve asset allocation, portfolio construction and performance attribution capabilities of Aladdin

### Aladdin Platform Analytics

- Enable access to analytics across BlackRock and the Aladdin community, as well as modernizing the underlying components of the analytics creation process
- Empower citizen developers in our investment and risk management teams with the latest in data, analytics and compute capabilities

### Active Investing Analytics

- Develop and deliver analytic content for the Active Equities and Active Fixed Income investment businesses
- Deliver single-security valuation and risk models, and evolves Aladdin's risk management capabilities

## We partner with:

- **Internally:** Portfolio Managers, Risk Managers, Product Strategists, Portfolio Consultants, COOs of Investment teams, and many others
- **Externally:** Aladdin client community

# Portfolio Analytics

## What will you do as an analyst?

- Gain an understanding of analytics, markets, and Aladdin's capabilities
- Utilize analytical models, reports and large-scale data processing tools to help investment teams and clients manage their portfolio risk, exposure and performance
- Perform special analyses in response to market events, new business opportunities and client needs
- Contribute to the creation, testing and roll-out of financial models, analytics and reporting for new security types and products
- Provide rapid response tactical solutions demonstrating critical thinking, programming skills and creativity
- Coordinate with colleagues globally, across cross-functional teams
- Engineer processes and improve tools to deliver analytics and support BlackRock's Aladdin technology infrastructure
- Improve operational efficiencies to enable scalable business growth
- Work with technology and analytics groups to build and deliver scalable customized solutions using Aladdin APIs and the Aladdin Data Sciences platform

## What capabilities are we looking for?

- Analytical approach
- Basic or intermediate coding and programming skills
- Presentation skills
- Problem solving
- Technical curiosity

## Your learning & development will include:

You will develop expertise in multiple core areas that will serve as the foundation for your career, including:

- Financial markets
- Clients and industries
- Technology and the Aladdin platform

# Quantitative Modelling

Positions are available in: Americas and Europe

The Quantitative Modelling group is responsible for researching, developing and implementing state-of-the-art quantitative models used to assess financial risk across fixed income, equities, derivatives, and alternative products. We use the expertise of our model researchers and our engineers, along with the collective intelligence of our partners across BlackRock and our client community, in order to deliver quantitative solutions and insights to help analyze investments and manage risk.

## Our business contains two teams:

### Research & Modelling

- Apply sophisticated mathematical and programming techniques to develop models and analytics for areas such as interest rates, equities, macroeconomic variables and scenarios, corporate credit, mortgages, structured products and portfolio risk, return attribution, and optimization
- Collaborate with partners across the organization to empower our large number of clients to manage their investments and risks
- Learn, build, collaborate and innovate across a wide variety of topics and projects

### Development/Engineering

- Architect our analytics platform to provide accurate, scalable, and reliable quantitative insights, for the trillions of dollars in assets that run on our investment platform, Aladdin
- Build and evolve applications to better deliver our analytics and models to clients
- Apply fast-growing technologies such as machine learning and cloud computing to enable more powerful modelling and analysis

## We partner with:

- **Internally:** We partner with Portfolio Analytics, Software Engineering, Aladdin Business and others, to build, implement and deploy our models & analytics to users of Aladdin.
- **Externally:** We engage with Aladdin clients to offer them thought leadership and subject-matter expertise -- helping them understand Aladdin's analytics capabilities and how they can help their clients manage their portfolios.

## What will you do as an analyst?

- Build and implement new and improved financial models on the Aladdin platform
- Engineer next-generation data and model platforms through use of cutting-edge technologies
- Apply quantitative and analytical skills to solve business problems and fulfill client requests
- Communicate sophisticated models to clients and end users with varying technical backgrounds
- Build financial and statistical knowledge while improving quantitative skills
- Contribute to high-profile projects that advance BlackRock's top strategic priorities

# Quantitative Modelling

## What capabilities are we looking for?

- For developer/engineer roles, proficiency in Java, C++, or other languages/technologies is required
- For model research roles, experience in systems such as R is strongly preferred
- Analytical approach
- Critical thinking
- Numerical skills
- Problem solving
- Technical curiosity

## Your learning & development will include:

- Developing your quantitative, analytical problem-solving skills
- Growing your understanding of risk analytics and how investors use them in managing portfolios
- Learning how technology platforms work to deliver quantitative insights reliably and at scale
- Gaining experience working with teams to run sophisticated projects and meet clients' needs

# Risk & Quantitative Analysis

Positions are available in: Americas, Europe, and Asia Pacific

The Risk and Quantitative Analysis business provides independent oversight of BlackRock's fiduciary and enterprise risks by crafting and delivering risk management, tailored advice and analytics. We promote BlackRock as a leader in risk management by providing top-down and bottom-up oversight to help identify investment, counterparty, operational, regulatory and technology risks. In addition to producing quantitative analysis to support BlackRock, we ensure portfolio risks are consistent across mandates, reflect current investment themes within particular strategies, and follow client-specific risk guidelines. We also work with other businesses across the organization to help portfolio managers build risk-aware portfolios and develop analytics used for risk and portfolio management using the capabilities of Aladdin.

## Our business contains four teams:

### Investment risk

- Advises investment businesses on portfolio construction, hedging strategies and other quantitative aspects of managing risk and return for portfolios.
- Develops expertise in global portfolio management teams' investment process in order to provide quantitative advice and risk oversight.

### Technology risk

- Helps define and supervise BlackRock's technology controls to protect our clients and the firm.
- Focuses on key risks such as technology outages, information security breaches and ineffective organizational change.

### Enterprise risk

- Identifies risks which directly impact the corporate entity.
- Responsible for all aspects of operational risk; error investigation, new product risk assessments and development of the operational risk framework.
- Includes technology, model, third party, and regulatory risk management.

### Counterparty & concentration risk

- Focuses on identifying potential counterparty credit risks inherent to BlackRock and its clients.
- Responsible for assessing, approving and supervising the creditworthiness of all trading counterparties, as well as analyzing BlackRock's exposure to these entities.

## We partner with:

**Internally:** BlackRock Portfolio Managers, Trading & Liquidity Strategies, Government Relations, Quantitative Modeling, Portfolio Analytics, Software Engineering, Legal and Compliance, Business Operations, Internal Audit, Finance

## Our team is known for:

- Partnering with global portfolio management teams to construct portfolios that are consistent with specified risk and performance objectives
- Maintaining integrity as a fiduciary to clients
- Holding unbiased insights into financial markets and portfolios
- Providing critical independent thought leadership
- Providing independent risk oversight for senior management of the firm and the Board of Directors
- Effectively communicating and influencing internal partners to manage risk

# Risk & Quantitative Analysis

## What will you do as an analyst?

- Apply statistical techniques to real financial data and live portfolios to aid portfolio managers' real-time decision making
- Learn to critique risk models, using experience and judgment to interpret the output and suggest model improvements
- Learn to communicate sophisticated ideas to key partners in a high impact manner
- Use R or Python to query data, run statistical analyses, and build data visualizations to optimally communicate insights.
- Get a deep understanding of financial markets and portfolio construction.
- Provide independent and consultative risk management services on a range of key projects including risk identification and evaluation of corresponding controls

## What capabilities are we looking for?

- Intermediate coding & programming skills in R and/or Python
- Analytical approach
- Strong communication skills
- Critical thinking
- Problem solving
- Relationship management
- Interest in financial markets
