

# Aladdin Wealth Technology

Positions are available in all regions: Americas, Europe and Asia Pacific

We are a fast-growing fintech business operating within BlackRock Solutions, and our mission is to demonstrate the power of BlackRock's data, scale and financial models to give financial advisors the edge they need to deliver better outcomes to their end customers.

The Aladdin Wealth Tech team partners with wealth management clients to help them oversee their enterprise risk, build better portfolios and enhance their value proposition to clients. This is achieved by leveraging risk analytics – powered by Aladdin® – to equip wealth management clients with model construction capabilities, risk monitoring tools and portfolio construction & analytics.

## Our business contains two teams:

### Client Teams

Manage and grow client relationships throughout the entire client lifecycle, from early-stage sales pitches and technical implementations to maintaining the relationship with live clients on the Aladdin Wealth platform

### Product Teams

Design, develop and deliver software and services that empower wealth managers to create better portfolios and deliver more value to their clients

Innovate and create higher scale in all aspects of our business, including the product, operations and client service model

*Note: Product team opportunities are only located in the Americas*

## What will you do as an Analyst?

### Client Teams

#### Relationship Management

- Develop a strong working relationship with clients to support the implementation and adoption of tools, including developing and delivering training and marketing materials for client use
- Learn about our clients' business strategies and the broader wealth management industry to inform the product roadmap
- Play an integral role in managing client relationships, including delivering on client commitments, responding to client inquiries and partnering to continue to enhance the service provided
- Actively manage client communications regarding product changes and improvements
- Ensure a smooth transition from Implementation to Production support

#### Client Delivery & Execution

- Develop a strong working relationship with clients to support implementation and adoption of tools
- Gather, compile, model, validate and analyze data from internal/external sources to provide insights
- Assist in the day-to-day project management of client implementations and client on-going engagements, including updating project plans, documenting user requirements and managing action items
- Perform technical analysis and support the development of core Aladdin models and risk systems

# Aladdin Wealth Technology

## Product Teams

- Develop application software and infrastructure through our end-to-end large-scale system supporting live clients 24/7
- The engineering teams primarily use Java and Scala for backend and Typescript with React for frontend
- The engineering teams measure, analyze, and improve the performance and reliability of Aladdin Wealth platform
- The backend engineering team develops the core libraries and high-performance APIs while monitoring and supporting the Aladdin Wealth platform; the team also uses distributed computing technology to scale up Aladdin Wealth capabilities to manage millions of portfolios
- The frontend engineering team develops scalable web applications, as well as iterates on UI/UX with design teams to create experiences that improve user delight for our users

## What capabilities are we looking for?

- Strong project management and coordination skills; able to manage multiple priorities
- Strong technical problem-solving skills, troubleshooting skills and analytical thinking
- Strong interpersonal skills, both written and verbal, with the ability to convey concepts simply and clearly
- Strong interest in finance and portfolio management; practical experience in the financial market is a strong plus
- For product teams, a solid hands-on programming experience in Java or other JVM-based languages for backend or React for frontend
- Strong enthusiasm for learning is a plus
  - For backend-focused roles, a passion for distributed systems and performance optimization is useful
  - For frontend-focused roles, an enthusiasm for UI and UX design is useful

## Your learning & development will include:

- A robust training program and ongoing development throughout your time with the firm.
- The skills and support network you need for a successful career at BlackRock.
- The opportunity to work with some of the most sophisticated clients globally, while learning fundamental financial and technological skills as well as software development lifecycle best practices.
- Mentorship from experienced software engineers, product managers, analytics specialists and client relationship managers on the team.
