What capabilities are we looking for?

- Analytical approach
- Basic or intermediate coding and programming skills
- Distilling large amounts of data
- Outcome driven
- Technical acumen
- Curiosity in the financial markets

Securities Lending & Trading

Securities Lending

Positions are available in all regions: Americas, Europe and Asia Pacific

BlackRock is a leader in securities lending, with a global presence and a broad footprint across equity and fixed income. Through cutting-edge technology and embedded research, our investment management approach to lending provides superior performance for our clients. In this fast-paced and dynamic environment, BlackRock is a pioneer of using quantitative techniques and sophisticated models to improve the performance of its Securities Lending business.

Our business contains six teams:

Product Strategy

The team plays a critical role in working with BlackRock's clients and internal client teams to enhance understanding of the securities lending market and BlackRock's platform.

Product Management

Oversee strategic design and change across core applications. The team works across the business and with technology, operations and other partner teams to coordinate and manage the development lifecycle.

Platform Development

Provide deep product expertise to drive the research, strategic planning and implementation of initiatives that are revenue-generating, risk-mitigating and regulatory-conforming.

Trading

Execute a meaningful role in alpha generation, optimizing returns through a variety of trade types. They are the primary owner of BlackRock's relationships with top tier prime brokerage firms.

Analytics

Responsible for generating data-driven insights to improve decision-making, extract incremental alpha and effectively manage investment risk across the Securities Lending business.

Electronic Trading

Develop our eTrading infrastructure and trading algorithms in close collaboration with Trading. The team is at the forefront of innovation and quantitative research.

What will you do as an Analyst?

- Create client and business presentations for both internal and external audiences
- Collaborate with business and partner team colleagues to progress our platform agenda; understand technology needs, document requirements and collaborate with our technology teams to drive innovation
- Partner with traders on alpha generation projects; learn about financial markets from an outstanding vantage point; understand how our traders manage their books as well as relationships with global financial institutions
- Conduct sophisticated data analyses through data gathering, processing and data science using languages such as SQL and Python to improve business decision-making and risk controls
- Partner with product experts to conduct research into new products and deliver on priority initiatives; work with our Legal, Compliance and operational teams to implement change

What capabilities are we looking for?

- Strong analytical skills, clear & structured thought processes
- Experience with Excel and other MS Office Applications
- Proficiency in SQL, VBA, Business Objects, Python preferred
- Excellent written and verbal communication skills
- High level of energy, drive and self-motivation
- Attention to detail, an appetite to learn, outcome-driven
- Demonstrated intellectual curiosity in financial markets
- Ability to prioritize and deliver assignments as promised
- Ability to distill large amounts of data
